

Automatic Infrared Tap

Hygienic No Touch Operation

p.58

Usage

The automatic infrared tap is ideal for use with Hyco Rho and Aquila instantaneous water heaters to provide optimum hand washing performance in washroom settings and for use with Hyco Speedflow and Powerflow unvented water heaters.

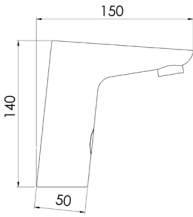

Features and Benefits

- Sprayhead tap with removable M22/ M24 nozzles
- Reduce water consumption by up to 50% compared to traditional taps by controlling the flow rate
- Save energy by up to 50% compared to traditional taps by reducing the amount of hot water required per hand wash
- When used with a Speedflow or Powerflow water heater a thermostatic mixing valve is recommended (see page 50)
- Rho and Aquila instantaneous water heaters are only intended for use with spray head taps of this type. If traditional taps which do not control the water flow rate are used then optimum performance will not be achieved.
- Supplied complete with a choice of tap spray nozzles
- Other flow rates available on request

Tap Spray Nozzle Options

Product Code	Max Flow Rate (l/m)	Best suited to water heater	Colour Code Identification
IN-TSN-2.5	2.5	4.4, 6.0 kW Rho	White/Green
IN-TSN-3.0	3.0	9.6 kW Aquila	White/Lilac

Product Code	Description	Reach (mm)
TAPIFR	Automatic touch free tap	110
