

Installation Guide

Zen Font with Drain

1. Contents

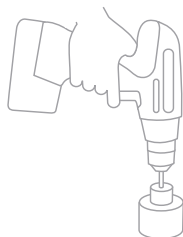

2. Installation steps

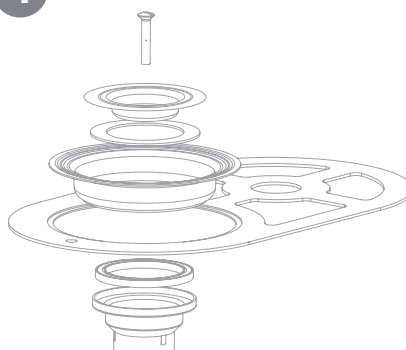

- 1 Select the location for installation. Take time to consider the tap and drainage installation requirements.

- 2 Using the supplied template, mark the centers of each hole onto the mounting surface.

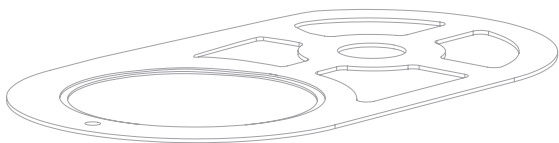

- 3 Drill the 3 holes as per the diameters stated on the template.

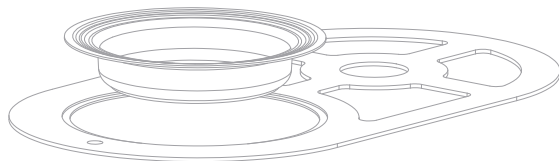

For a wooden/ mdf/ laminate surface - Treat the large hole cut with a coating of PVA adhesive (or similar) to help seal against moisture ingress.

- 4  Remove the centre bolt from the plastic drain section to disassemble, before reassembling onto the font bowl as shown.

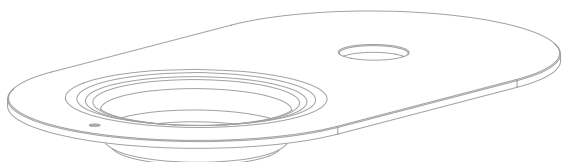

- 5** Align the font gasket over the 3 holes in the mounting surface, ensuring it is the correct way up (the bowl recess facing up).

- 6** Ensure the font gasket and font bowl are clean, dry and free from debris before carefully running a bead of silicone around the bowl recess and inserting the bowl.

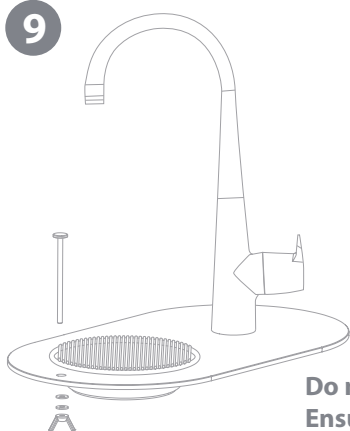

- 7** Run another thin bead of silicone around outer lip on the top of the font bowl before carefully placing the font glass over the gasket with the 3 holes aligned.

- 8** Install your chosen tap following separate instructions supplied with the tap.

- 9** Insert the long bolt with rubber O-ring through the smallest hole in the glass font. Fasten to underside of the mounting surface using first the rubber, then the steel washer and finally the wing nut.

**Do not over tighten.
Ensure rubber washer is used.**

- 10** Run a bead of silicone around the outer edge of the glass to seal.

- 11** Connect the plastic drain section to your existing waste / drain (standard sink trap size 38mm) using appropriate fittings (not supplied).
